INSTRUCTIONS AND GUIDES FOR MANAGING EDUCATION.CABL.CH

A. Login credentials

http://education.cabl.ch/wp-admin
user: cabl-editor
pass: 7#@LYpiret-1

01. **Login in the WP admin area**
then follow the steps as in the screenshots below

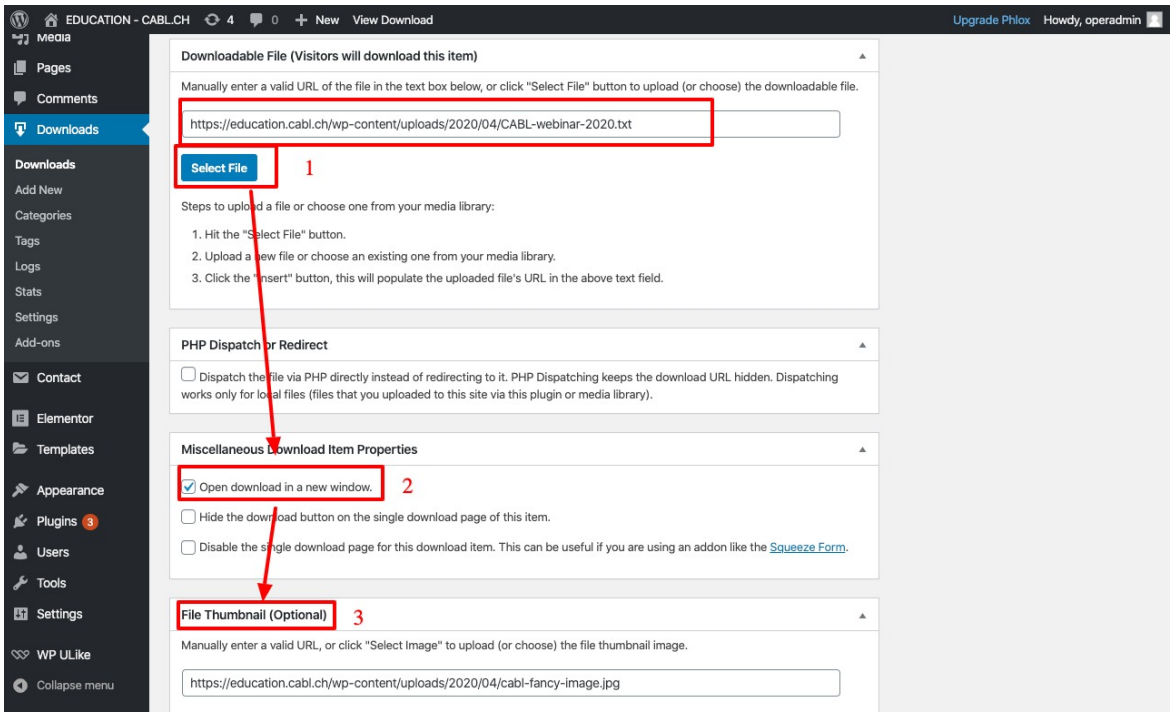

First: create the Download File with dhe DOWNLOADS plugin
(As you can see, the LondonBusinessSchool is already listed in the main area.)

02

Select the download file, with the “Select file” button.

I’ve highlited the required step, the other are optional. So, do as you like…

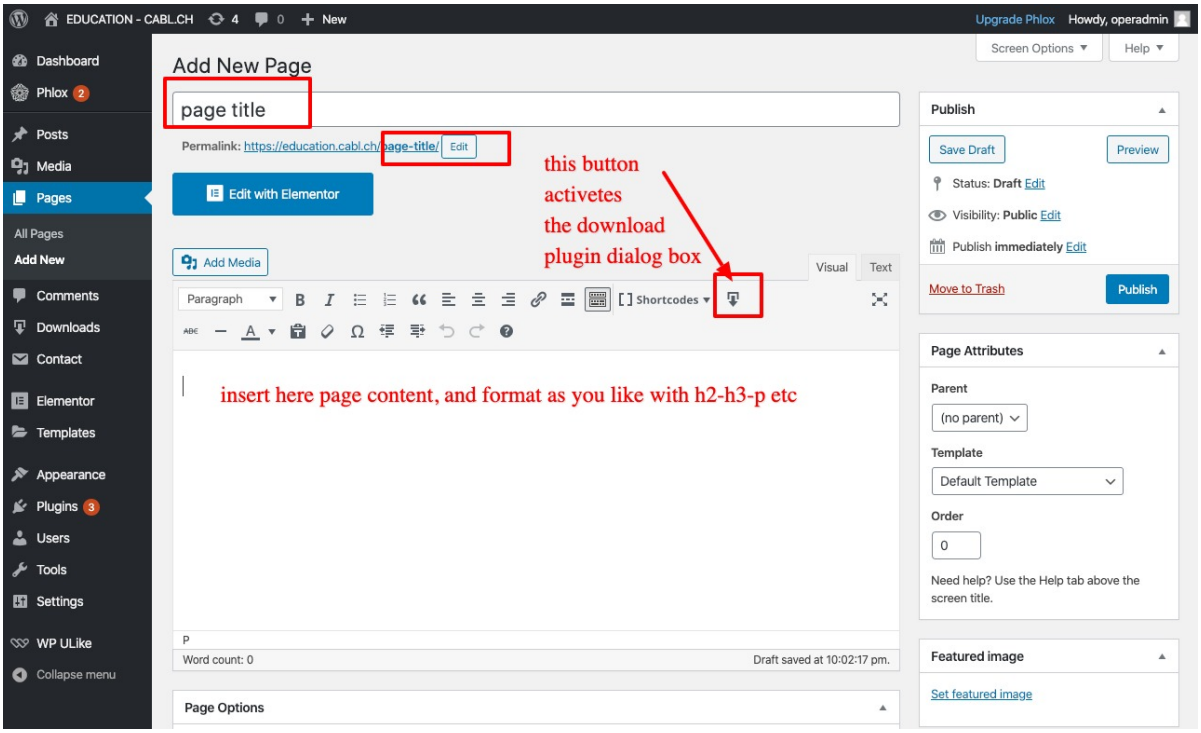

As you’ve created the download file, then you have to create the New Page (the one that will host the downloadable content).

03 Create the New Page

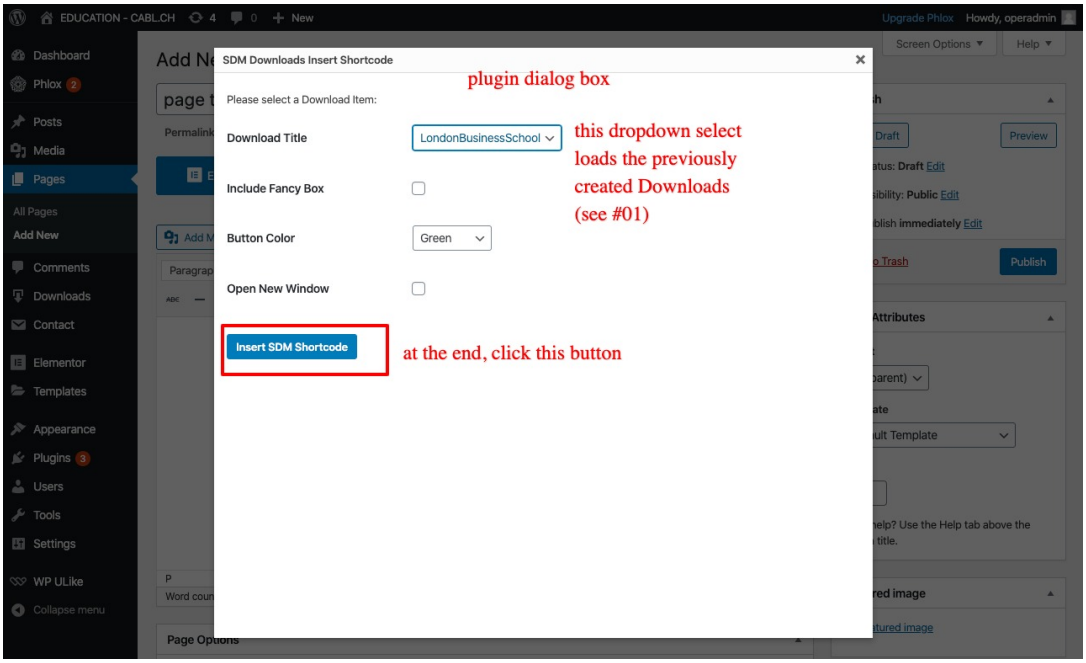

As with WPress: fill the Page Title Field

- Permailink
- And insert the page content

Finally the button below will launch the download dialog box (see image #04)

04 PLUGIN DIALOG BOX

The **dialog box** will load the previously created “download file” (step01). The file will shown in the dropdown box (accordign to the file name you’ve previously created)

Now save the page.
…That’s it!

You can inspect the London Business File, already created, as model for the new ones.
Feel free to ask me for any question…
Hope this document will help in the next Course creation….
